

UV/Visible/LED Curable Ultra-Clean Heat Resistant Temporary Mask

PRODUCT DESCRIPTION

Incure Litemask™ 3148 UV Curable blue mask is a 100% solids, ultra-clean peel-able mask used widely in the electronics and aerospace industry. Cures tack-free in seconds, it forms a tough and flexible mask for surface protection against chemical stains and scratch marks. Contains no VOCs, its ultra-clean formulation does not affect masked surfaces before cure and leaves no residue or contamination after removal. High temperature resistant, with typical application thickness ranges between 30um to 3,000um, Incure 3148 is ideal for protection of critical surfaces during manufacturing processes.

SHELF-LIFE, STORAGE, USE AND HANDLING OF THIS PRODUCT

Shelf-Life of this unopened product is a minimum of ONE (1) year from date of manufacture. Avoid direct exposure of bottle to visible light at all times. Containers should remain covered when not in use. Product should be stored in a dark cool place of 2°C to 20°C. Transfer of product into other packages void all warranties. Users should ensure all bonding surfaces are free of grease, mold release, or any contaminants, as bonding performance will be compromised. All tests for cured bonds should be carried out at ambient temperature. For safe handling of this product, please read Material Safety Data-sheet (MSDS) prior to use. Organic solvents, such as IPA, may be used to wipe away uncured material from surfaces.

EtO and GAMMA STERILIZATION (Not Applicable for this Product)

All Incure Medical products are formulated to subject to standard sterilization methods, such as EtO and Gamma Radiation of 25 to 50 kGrays (cumulative). Enhanced moisture and thermal resistance of this product show excellent adhesion and bonding strength after one cycle of steam auto-clave test. Depending on bond design and structure of the application, users should test specific assemblies after subjecting them to the test requirements. Please consult Incure Support Team for assistance, if your devices are subjected to more than one sterilization cycles.
