

UV/Visible/LED Curable Gasket/Mask/Sealant for Electronics

PRODUCT DESCRIPTION

Incure Uni-Seal™ 3393 UV/Visible/LED curable adhesive is an acid-free, low viscosity form-in-place and cure-in-place gasket (FIPG/CIPG) material. Used mainly as a sealant or temporary mask in selective conformal coating, it protects components on PCBAs prior to conformal coating process. Soft yet tough, it cures tack-free and provides air-tight adhesion to substrates with the benefit of ease-of-peel during rework. Incure 3393 exhibits superior moisture and temperature resistance. It is also widely used in electronics and automotive industry for its chemical resistance.
